

Solid Brass Padlocks

PL40B, PL50B, and PL60B Series - Applications, Features, Care, and Pictures

APPLICATIONS:

The 40 Series, 50 Series, and 60 Series heavy-duty solid brass padlocks are corrosion, rust, and weather resistant. The 40 Series and 50 Series padlocks are available with longer shackle lengths for greater shackle clearance. Solid brass padlocks are suitable for commercial or residential use; vispack packaging available only.

FEATURES:

MECHANISM: Precision brass pin tumbler mechanism

SHACKLE: Hardened shackle with electro-plating resists hacksaw cutting. Shackle engaged at both ends for greater security.

SHACKLE DIMENSIONS: For all dimensions refer to page F:4

KEYING: Keyed alike, keyed different

PIN: 5-pin = 40 Series and 50 Series
6-pin = 60 Series

KEYS: 2 keys

CARE:

Tips to keep the locks in the best working condition:

Lubricate the locks periodically with graphite or similar dry lubricant. Apply lubricant sparingly in both the keyway and shackle openings.

Your lock is only as strong as the handle / latch on which it is hung.

When the lock is operated rarely or exposed to harsh weather conditions, internal working parts may become tight. In such cases, you may apply a minor downward pressure on the shackle while the key is being turned.
