INSTRUCTIONS FOR INSTALLATION OF ENTRANCE LOCKS IN NEW DOORS OR THE REPLACEMENT OF EXISTING LOCKS

FOR USE ON DOORS 1-3/8" TO 1-3/4" (35mm - 45mm) THICK

TOOLS REQUIRED FOR NEW INSTALLATION
1 phillips head screwdriver
1 2-1/8" (54mm) hole saw
1 1/2" (25.4mm) drill bit
1 chisel

FOLLOW ALL STEPS FOR REMODELING OR NEW CONSTRUCTION.

FOLLOW STEPS 3C, 4C, 5, 6, 7, 8, 9 and 10 FOR DO-IT-YOURSELF REPLACEMENT AFTER REMOVAL OF EXISTING LOCK.

REPLACING EXISTING LOCKS:
Before beginning, measure from center of lock to door edge in order to check length of backset on existing lock. The backset length of new lock is stated clearly on front of package.
If backset size is the same, you'll have to replace lock with proper size backset.

TOOLS REQUIRED FOR REPLACEMENT INSTALLATION:
1 phillips head screwdriver

ILLUSTRATIONS ARE SHOWN WITH ENTRANCE MODELS. INSTALLATION IS SAME FOR PRIVACY AND PASSAGE MODELS AS WELL.

INSTALLATION INSTRUCTIONS

1. MARK DOOR

   MARK FOR 1" (25.4mm) HOLE IN DOOR EDGE
   MARK FOR 2-1/8" (54mm) HOLE ON DOOR FACE
   (NOTE: Backset on door face must be same as backset of lock.)

2. DRILL HOLES

   Drill 2-1/8" (54mm) hole through door face as marked for lockset.
   It is recommended that holes be drilled from both sides to prevent splitting.
   Drill 1/2" (12.7mm) hole in center of door edge for latch.

3. INSTALL LATCH

   Insert latch in hole keeping it parallel to face of door.
   Mark outline and remove latch.
   Chisel 1/8" (3mm) deep or until latch face is flush with door edge.
   Insert latch and tighten screws.
   (NOTE: Latchbolt bevel must face to closing direction.)

4. INSTALL STRIKE

   Close door until latchbolt touches jamb to locate strike in jamb and center line of strike.
   Open door and extend line from mark to door stop.
   Measure one half of door thickness from door stop and vertically mark drill point center for strike.

   Drill 1/2" (12.7mm) deep in doorjamb on drill point for strike.
   Cut out jamb 1/16" (1.5mm) deep for strike.
   Guardbolt stops against strike, as illustrated, preventing forcing when door is closed. Adjustable tang on strike permits bending in or out to eliminate too loose fit between door and door stop.

   CAUTION: To ensure proper lockset function, hole in jamb must be drilled a full 1/2" (12.7mm) deep.
## 5. Remove Insidetrim

Use nail end of wrench provided to depress inside knob catch in hole of inside sleeve collar and slide knob in side lever of spindle.

- **a** Depress spring attached to inside rose. Insert nail end of wrench into slot to remove inside rose plate.

- **b** Remove inside玫瑰 and mounting plate.

## 6. Adjust Outsiderose

Adjust lock to fit door thickness by rotating outside rose. Lock will fit all doors 1-3/8" to 1-3/4" (35mm—45mm) thick.

## 7. Install Lock

Latch unit must be in place before installing lock. Be sure lock housing engages with latchprongs and retractor interlocks with latch tail.

## 8. Install Inside Rose

**A. For Wooden Door**

Tighten machine screws securely to install mounting plate. Press rose onto mounting plate. Be sure to fit rose in recess of mounting plate.

**B. For Metal Door**

**NOTE:** Make sure that mounting plate fits horizontally into slots notched in door.

Tighten machine screws securely.

## 9. Installation of Inside Knob or Inside Lever

To install inside lever, press down the lever catch in the hole with wrench and push inside lever all the way in until catch clicks into catch hole.

- **a** **Notch**

- **b** **LUG**

- **c** **SLOT**

**IMPORTANT:** Align lug on knob with narrow slot on side of spindle and push knob all the way in until knob catch clicks into slot on knob. Otherwise knob will jam on shaft.

## 10. Right Keyhole Position

Upon installation of the lock, it may happen that keyhole faces upward or downward as shown in the following drawing. It is advisable to correct all keyholes to be facing downward.

- **a** **DOWNWARD**

- **b** **UPWARD**

## 11. In Order to Adjust the Abnormal State of the Keyhole Facing Upward, the Knob Must Be Pulled Out and Installed Again. The Method of Installation is Described As Below D.

- **a** First turn the knob clockwise until the knob catch appears in the small hole.

- **b** With the other hand, turn the key counterclockwise within the limit of 30° — 90°

- **c** Using a small nail to press the knob catch and pull the knob out.

- **d** Install again according to the correct direction.
Note: When printing this template for use, **DO NOT** "Fit to Paper," or scale page down. Print page at 100% scale.
