INSTALLATION INSTRUCTIONS

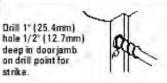

CAUTION: To ensure proper lockset function. Hole in jamb must be drilled a full 1/2 (12.7mm) deep.

Guardbolt stops against strike, as illustrated, preventing forcing when door is closed. Adjustable tang on strike permits bending in or out to

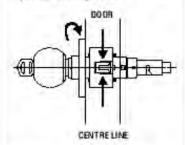

GUARD BOLT

3/4

eliminate too loose fit between doorand door stop.

6. ADJUST OUTSIDE ROSE

Adjust lock to fit door thickness by rotating outside rose. Lock will fit all doors 1-3/8" to 1-3/4" (35mm~45mm) thick.

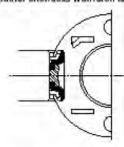

7. INSTALL LOCK

Cut out jamb 1/16"

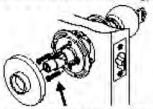

strike. Tighten screws.

(1.5mm) deep for

Latch unit must be in placebefore installing lock. Besure lock housing engages with latch prongs and retractor interlocks with latch tail.

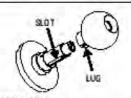

Tighten machine screws securely to install mounting plate. Pressrose onto mounting plate. Be sure to fit rose in recess of mounting plate.

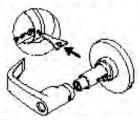

TIGHTEN MACHINE SCREWSSECURELY

9. INSTALLATION OF INSIDE KNOB OR INSIDE LEVER

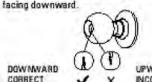

IMPORTANT-Align lug on knob with narrow slot on side of spindle and push knob all the way in until knob catch clicks into slot on knob. Otherwise knob will jamb on shaft.

To install inside lever, press down the lever catch in the hole with wrench and push inside lever all the way in until catch clicks into catch hole

10. RIGHT KEY HOLE POSITION

Upon installation of the lock, it may happen that key hole faces upward or downward as shown in the following drawing. It is advisable to correct allkey hole to be

DOW/MVARD CORRECT

UPWARD INCORRECT

11. IN ORDER TO ADJUST THE ABNORMAL STATE OF THE KEY HOLE FACING UPWARD, THE KNOB MUST BE PULLED OUT AND INSTALLED AGAIN. THE METHOD OF INSTALLATION IS DESCRIBED AS BELOW D.

First turn the knob clockwise until the knob catch appears in the small hole.

With the otherhand, turn the key counterclockwise within the limit of

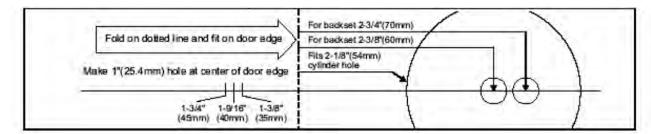

C

Using a smallnail to press the knob catch and pull the knob out

Install again according to the correct direction.
